

LOW POWER PARTIES

The aim of the “Low Power Parties” (LPP) is to promote CW and low power communication.

The Low Power Parties are friendly, relaxed low power CW meetings. Besides bringing you the joy of meeting other operators, your rig and antennas can be put under the test, whether or not hi-tech or basic, commercial, homemade or kitted, new or old, vintage or ex-army.

Transmit power

Any power level between 0 and 25 watt, however the 5-watt QRP standard is recommended.

Date & time

| |
|------------------------|
| Sunday 08:30-09:30 UTC |
| 7025-7035 kHz |
| 10110-10120 kHz |
| 14055-14065 kHz |
| 18080-18090 kHz |

| |
|------------------------|
| Monday 18:30-20:30 UTC |
| 3555-3575 kHz |

Logs

Participants are kindly invited to enter their logs online, see <http://www.on5ex.be/foxhunt/>, after obtaining a unique password (see the “[WANT TO BE A LOGGER?](#)” field on the web page).

Mailinglist

Keep your fellow radiohams posted about your activities and comments by subscribing to and using the [mailing list](#).
